

CS1528C / CS1528CT pH electrode

Hydrofluoric acid environment is applicable

specifications

PH Range: 0-12pH

PH Zero point: 7.00 ± 0.25

Hydrofluoric acid concentration: 4,000 ppm

Temperature range: 0-100°C

Pressure resistance: 0-0.6MPa

temperature sensor:

CS1528C: None

CS1528CT: NTC10K/NTC2.2K/PT100/PT1000

Shell material: glass

Membrane resistance: <800M Ω

Reference system: Ag / AgCL

Liquid junction boundary: porous ceramics

Double-salt bridge system: Yes

Electrolyte solution: KCL

Connection thread: PG 13.5

Cable length: 5m or agreed

Cable connector: pin, BNC or convention

number of order

name	content	number
temperature sensor	not have	N0
	NTC10K	N1
	NTC2.252K	N2
	PT100	P1
	PT1000	P2
Cable length	5m	m5
	10m	m10
	15m	m15
	20m	m20
Cable joint	Line head boring tin	A1
	Y male tab	A2
	A word inserted needle	A3
	BNC	A4
